

# Customer Procurement Punch Out Experience

## • What do we need to get started?

- Kick-off call with customer
  - Align on Integration Expectations
  - Defined Test Scenarios
- Connectivity established with the customer's Procurement Tool.
- Predefined list of products and agreed-upon pricing with the customer.

## • What is the average timeline for implementation?

- Establish connectivity with customer's procurement system in test and production environments.
  - Test 1-2 scenarios with the customer.
  - Customer to sign off on UAT.
  - WWT ISR update agreed upon products in production catalog.
  - Grant users access provided by the customer to application in production.
- = 4-6 weeks (Note: This is dependent on customer response time and UAT.)
