

GenAI Use Case Discovery for Public Sector

Develop a plan to implement your top AI organization priority in AWS

Who is this For?

Governors, Mayors, CIOs, CTOs, data owners, leaders, and IT Directors. Plus, anyone interested in discovering which AI business use case is of the highest priority and what it will take to build it.

Duration:

- Three weeks: Initiation meeting of 1 hour, use case workshop of 8 hours, and proposal review of 2 hours.

Your Time:

Customers should plan for a total of 11 hours of effort from their employees in aggregate.

Post-Workshop Actions:

You will leave the workshop with a solid proposal that details what needs to be built to solve your top AI use case, how long it will take, and how much it will cost.

Unlock AI-Driven Success

Our Generative AI Use Case Discovery Workshop helps you identify and address organization challenges using AWS Cloud for AI. The workshop includes an exploration of generative AI concepts and AWS Cloud capabilities tailored to your needs. The workshop includes an overview of generative AI on AWS Cloud, use case analysis, prioritization of use cases, and a high-level technical solution and production implementation recommendation for the top use case.

Are you ready to revolutionize your organization with cutting-edge artificial intelligence (AI) solutions? Our Generative AI Use Case Discovery Workshop is designed to help you identify and tackle your most pressing business challenges using the robust capabilities of AWS Cloud.

Deliverables

- ▶ Pre-workshop briefing outlining goals, stakeholders, and expected outcomes
- ▶ Use case identification of a high value use case that can be addressed with Amazon AI
- ▶ High level technical solution that recommends the target technology needed to implement the solution into production
- ▶ Production implementation proposal that outlines the scope, cost, and time to build the solution and deploy it
