

AWS Marketplace

Navigate the marketplace with confidence

What is the AWS Marketplace?

The AWS Marketplace is a digital catalog that offers software, data, and services from 3rd party vendors to help organizations find, buy, deploy, and manage solutions that run on AWS. It provides a convenient way for customers to discover and acquire a variety of offerings that complement AWS cloud solutions.

Why WWT for AWS Marketplace?

WWT offers numerous benefits and advantages to clients who transact their 3rd party software spend via Channel Partner Private Offer (CPPO), focusing on four key areas to ensure clients can receive the most value out of their AWS Marketplace transactions:

Burndown on consumption for software enterprise agreements (up to 25% of AWS PPA)

Infrastructure Credits when leveraging WWT's CPPO Promotional Program

Marketplace Assessments to review spend and potential transactions
